NSSL offers rental option for BGAN terminals

Availability: Global

People who need satellite communications at short notice and limited periods, such as journalists and aid workers, can now rent terminals from provider NSSL.

- ▶ The option means infrequent users do not need to take on the cost of buying equipment that is unused for much of the time, but can rely on getting hold of solutions quickly.
- ▶ Terminals from across the BGAN range are available to meet customer's specific requirements.
