## NSSL leads with airtime management portal

**Availability:** Global

**Inmarsat service:** Fleet

**Insight is a unique airtime management portal from satellite communications provider NSSL that allows customers to access online account information from any internet connection in the world simply by entering a password.**

- View terminal information such as PIN codes and PUK information - details which when lost have previously hindered users in the field.
- Control costs by setting limits on individual terminals and monitoring call data records (CDR) including type of calls made, length and total call costs.
- View and download airtime invoices, cutting down on paper communications.
- Generate customised reporting on spend and usage.

**Connect Direct**
