

Hughes 9201

Hughes 9201

The Hughes 9201 Satellite IP modem brings the full portfolio of BGAN services to multiple users via a single device.

The terminal's rugged design makes it ideal for medium to long-term installation in remote regions, whilst its small size and weight ensures ultimate portability.

The terminal can be set up in minutes using either the LED indicators or the BGAN Launchpad ensuring that remote teams can have full access to their corporate networks and business critical applications in just minutes – anywhere, anytime.
