

IRIDIUM

## Iridium 9505A

### The Iridium 9505A Handset

The Iridium 9505A is small, lightweight and easy-to-use, with inexpensive call charges.

The 9505A is capable of voice, fax, data and SMS communication. It is ideal for industrial or rugged conditions due to its resistance to water, dust and shock, yet also suitable for the traveling professional.

Iridium offers global coverage via a network of 66 LEO (Low-earth-orbiting) satellites, making the 9505A the only handheld satellite phone to offer worldwide coverage.\*

\* Regulatory constraints could disallow the Iridium service in certain countries, please contact your NSSL Account Manager should you have any concerns in this regard.
