

IRIDIUM

Iridium 9555

The Iridium 9555 Handset

The new Iridium 9555 is the smallest and most powerful handset in the Iridium portfolio.

It is every bit as rugged as Iridium's previous handsets – still resistant to water, dust and shock – but streamlined and packed with innovative new features.

These new features include an integrated speakerphone, Improved SMS and e-mail messaging capabilities, and an upgraded Mini-USB data port. Making communication more efficient and effective to end users.

The Iridium 9555 is also connected to the only truly global* mobile communications network, so wherever your requirements, the 9555 is always connected and reliable.

* Regulatory constraints could disallow the Iridium service in certain countries, please contact your NSSL Account Manager should you have any concerns in this regard.
