

Thrane & Thrane Explorer 300

Thrane & Thrane Explorer 300

The Thrane & Thrane Explorer 300 is amongst the smallest and most compact BGAN terminals in the Explorer family, providing the single remote user with high-speed data and voice services in remote areas.

Weighing just 1.28kg, this Class 3 terminal provides not only standard IP data rates of up to 384kbps/240kbps; it also offers additional Streaming IP channels of 32kbps and 64kbps.

This user friendly terminal and Launchpad software ensure that the terminal is easy to set up giving the user access to the full range of BGAN services in just minutes.
