

IRIDIUM

## Sailor SC4000 Iridium

### The Sailor SC4000 Iridium

The Sailor SC4000 Iridium is the only fixed satellite telephone with global coverage\*. The compact SC4000 consists of three units: the antenna SA4110, the transceiver ST4120, and the intelligent handset SC4150 (a handset and control unit in one), that allows up to 4 handsets to operate. The SC4000 is well suited for all types of vessels from fishing boats to yachts and cruise liners. The system is also compatible with SSAS (Ship Security Alert System).

Call charges for using the SC4000 are inexpensive, and the phone is capable of voice, fax, data and SMS communication. The standard data rate is 2.4kbps.

\* Although, for political reasons, the following countries are currently switched off: Hungary, Poland, Northern Sri Lanka and North Korea.

# Thrane & Thrane
