

Thuraya SG-2520

The Thuraya SG-2520 Handset

The Thuraya SG-2520 is the most advanced of the Thuraya handsets, providing users with Satellite, GSM and GPS communication options from virtually any remote location.

Weighing just 180gms, the SG-2520 is small and lightweight, making it one of the smallest dual mode satellite phones available. It is also fully equipped with distinct features such as a built-in 1.3MP camera, high-resolution colour screen, and the choice to communicate through advanced SMS, MMS and e-mail applications.

Thuraya offers coverage in over 110 countries throughout the world, including Europe, North and Central Africa, The Middle East, Central Asia, The Indian subcontinent and has recently extended its coverage to include East and South East Asia.
